# When you experience snow without limits

ZEISS snow goggles

// INNOVATION  
MADE BY ZEISS

## ZEISS snow goggles

The centenary know-how in the optics and its constant research is incorporated in an innovative product development.

The result is a wide range of performance solutions with an innovative light and thin design, for a new visual experience on the slopes.

Standard goggle

# goggle features

## total customizability

Removable spoiler, interchangeable spare lens and strap\* to create your personal style and challenge every light condition.

\* only with Combo snow goggles

## wider field of view

ZEISS patented super thin design for maximum vertical and lateral extension of the field of view. Fast reactions enabled, freedom of movement and lightweight.

## extended comfort

Soft triple-layer thermoformed foam for a velvet-like feeling. Perfect face and nose fit.

## perfect fit

Outrigger with double-movement system and silicone strap for a stronger grip and a higher helmet compatibility.

## combo

Stylish design and maximum customization. Two brand new fluo models with a set of interchangeable items: two lenses, two straps and two spoilers.

### FLUO ORANGE – Multilayer ORANGE

### JUNIOR WHITE – Multilayer PINK

Brown  
Multilayer Pink + Hydrophobic

### Lenses for combo, mono and duo models for individual sale.

## safe and crisp vision

Superior visual acuity in different light conditions, guaranteed by ZEISS stringent optical tests. Total protection against UVA/UVB/UVC rays and nature's elements.

## exclusive ZEISS Sonar color technology

ZEISS patented latest color technology. Designed to read bumps and hollows on the slopes in changing light conditions. Maximum contrast enhancement and faster reactions.

## ZEISS performance coatings

**Ri-Pel and Hydrophobic:** water repellent and easy to clean transparent treatment. Water, snow, dirt and sweat slip off the lens, which stays clean longer. **Uniform Multilayer:** multilayered coating with uniform technology. Homogenous shimmering effect all over the lens. Maximum protection against glare. **Uniform Super Silver:** stylish and shiny silver effect that doesn't alter the visibility. Homogenous effect all over the lens.

Filter category	Light Transmission from % to %	Description	Usage	Symbol
S0	80,0 100,0	LIGHT TINT	Very limited reduction of sunglasses	☁
S1	43,0 80,0	LIGHT TINT	Limited reduction of sunglasses	☀
S2	18,0 43,0	GENERAL PURPOSE	Good protection against sunglasses	☀
S3	8,0 18,0	GENERAL PURPOSE	High protection against sunglasses	☀
S4	3,0 8,0	VERY DARK: SPECIAL PURPOSE: VERY HIGH SUNGLASS REDUCTION	Very high protection against extreme sun radiation over snowfields, on high mountains.	☀
